3.00 PM
Welcoming Speech
Dr Benjamin Cheah, Lead Hacking Health KL
Insights from STRATEQ Lab
Mr Leon Jackson, Chief Innovation Officer

3.20 PM
Forum discussion
Moderated by Dr Prathaban Raju

Panelist
Mr Jerry Hang Getdoc
Dr Raymond Choy Doc2Us
Dr Hoh Hon Bing Teleme
Mr Nic Lim homegp.asia
Mr Maran Virumandi DoctorOnCall
Dr Alan Teh Malaysian Medical Association

5.00 PM
Questions & Answers
There will be a Google Link throughout the event so that questions can be streamed in real time to the Moderator
This section is open for any further discussions

5.30 PM
Closing
We will unveil the future plans for Hacking Health both for its Clinic Series as well as the Hackathon
The future of healthcare is here …..

Technology is growing at a rapid rate over the last couple of decades. A whole new generation is growing up in an environment where communication is seamless and where the world literally resides within your computer.

Healthcare remains an area where change has been slow. The financial, airline and retail businesses have been rapidly adopting technology to its advantage. It is inevitable that the delivery of healthcare will change in the years to come.

There are already a few startups focusing on delivering healthcare in this digital era in Malaysia. It removes the need for a physical space and literally puts healthcare at your fingertips. At Hacking Health, we believe that this is the way forward. However, regulation in this area is still lacking and the potential for disaster remains high. Planning its future course especially among stakeholders is key in order to ensure its sustainability, growth and acquire a high adoption rate among the different strata of society.

This session hopes to understand the inspiration behind these healthcare startups and to tackle some of the pertinent issues surrounding ‘Uberisation of Healthcare’.
Panelist

Moderated by

Dr Prathaban Raju
Jerry is an aspiring serial entrepreneur who has a broad experience in setting up and managing multiple businesses ranging from brick and mortar businesses to managing a tech start-up currently.

He started off his entrepreneurial journey when he was barely out of college that too in a foreign land (UK) where he travelled and lived alone for a period of time. Life also saw him return to Malaysia and do something similar. He earned his 1st half million ringgit at the age of 23 and also lost everything at the age of 25!

Jerry is a branding and marketing enthusiast, creative thinking, strategic planning and digital marketing are his forte. Besides that, he also believes that there is nothing in this world that cannot be sold! How about selling ice to an Eskimo? Commencing his entrepreneurial journey in the F & B industry, he slowly ventured into the Healthcare industry inspired by his personal experience. Prior to GetDoc, he was managing his own medical supply company for about 2 years.

Jerry is spearheading GetDoc Malaysia that intends to redefine and revolutionize the existing healthcare ecosystem, to deliver an excellent healthcare experience through technology and education to patients. GetDoc is not just a doctor appointment booking system; they also are involved in developing and building Smart Healthcare IOT Devices, TeleHealth Portal, Educational Portal, House Call Services etc.

It is noteworthy to mention that GetDoc was one among the 5 start-ups selected to represent Malaysia at Silicon Valley for a 2-week Start-up Bootcamp Program in 2015.
Dr Raymond Choy is the co-founder of Doc2Us mobile application which provides a platform for public to communicate with healthcare providers via its in-app messaging services. He is currently a medical practitioner specialising in family medicine and aviation medicine in Singapore.

Dr Choy studied medicine in International Medical University in 2003, subsequently graduated from the University of Manchester with Bachelor of Medicine and Bachelor of Surgery. He then continued his training in John Radcliffe Hospitals in Oxford before coming back to South East Asia. He believes that there is a paradigm change of today's patients' behaviours ranging from seeking medical information, understanding their own conditions, modifying their lifestyles, tracking their own health to accessing affordable convenient healthcare services.
Dr Hoh Hon Bing
co-Founder

Dr Hoh graduated with Bachelor of Medicine (BM) from Southampton Medical School, UK in 1988 winning 2 prizes at the medical school namely, the Tenovus Oncology Prize and Sutton Prize for Surgery. He was elected Fellow of the Royal College of Ophthalmologists, London (FRCOphth) in 1992 and subsequently Fellow of the Royal College of Surgeons, Edinburgh (FRCS). He obtained a Doctorate degree in Medicine (DMed) at Bristol University with a doctorate thesis entitled ‘Biochemistry of Keratoconus’ in 1999.

His training in Ophthalmology began at Moorfields Eye Hospital, London and later at Bristol Eye Hospital (1991 to 1997) where he was appointed Clinical Lecturer in Ophthalmology at the latter institution for 2 years prior to his return to Malaysia in 1997 as Associate Professor in Ophthalmology at University Malaya. During his tenure at University Malaya, he was also elected as the President of the Ophthalmological Society of the Malaysian Medical Association for 2 terms (1999-2001) and served as a visiting lecturer to the National University of Singapore.

He has over 50 international research publications in various international journals such as Ophthalmology, Journal of Cataract & Refractive Surgery and British Journal of Ophthalmology. He also wrote a general ophthalmology textbook ‘Clinical Cases in Ophthalmology’ (published by Butterworth-Heinemann, 1995).

He has won several Awards in Ophthalmology Research & Surgery
• Fould’s Trophy (for best paper presentation as co-author in 1993 at the Royal College of Ophthalmologists, London)
• Alcon Ophthalmic Video Prize (for best surgical teaching video in 1994)
• Bowman’s Cup (for best scientific research in 1995 at the Oxford Congress, UK)
• Poster Prize (for best scientific research in 1995 at the Royal College of Medicine, London registrar’s meeting)
• Ethicon Travelling Scholarship (presented by the Royal College of Ophthalmologists, London in 1997)
Maran Virumandi
co-Founder

Maran was Tenaga Nasional Scholar & Dean’s List recipient at Lincoln University, New Zealand & a qualified accountant (CIMA, CGMA, MIA) and has participated in Harvard Senior Mgmt. Development Program. He spent the last 18 years in various MNCs in Technology and in Management Consulting. He co-founded DoctorOnCall.com.my to lead a meaningful disruption in Healthcare for the benefit of both the Malaysian public & medical service providers.
Dr Alan Teh

Medical doctor and mobile tech enthusiast who blogs tech at palmdoc.net and medicine at medicine.com.my

Nic Lim

Founder

homegp.asia

Nic Lim is the founder and CEO of 8Common Limited (ASX listed) and Partner at 8Capita, a Singapore-based investment partnership with over 30 early-stage technology investments within its portfolio. Prior to that he co-founded Catcha.com.
